

Baycinco/SL

RCP-2000

**Machine to close one end of
midirollers and insert plastic
mechanism**

Technical Data

Installed Power	0,5 KW
Power Supply	220 V, 50/60 Hz
Air Consumption	90 lt/min at 6 bar
Dimensions (A x B x H)	1,2 x 1,2 x 1,8 mt
Weight	500 Kg

Function and output

The machine assembles the midiroller sleeve coming from the machine CRRA-2500 and its plastic mechanism and closes the open edge of the midiroller.

The inner diameter of the tube can be from 24mm up to 30mm wide.

The machine can only assemble one tube diameter.

The output is +/- 1600 pieces/h

Input *plastic mechanism, miniroller sleeve*

Output *Assembled miniroller*
